1183 B. Wherever possible, the ~~((current expense))~~ general fund cost to be allocated
1184 shall equal the benefit received by the county fund receiving the charge~~((:))~~:

1191 ~~established prior to budget balancing and shall be utilized by the executive to develop the~~

1215 expenditures shall submit to the executive a statement of unanticipated expenditures. The
1216 statement shall specify any request for supplemental appropriation by program, project,

1217 object of expenditure or any combination thereof. The executive shall review the
1218 requests in accordance with the department's or agency's work plan and determine
1219 whether to submit a supplemental appropriation request.

1220 2. If during the fiscal period the executive determines that revenues will be less
1221 than the expenditure amounts included in the appropriations ordinance, the executive
1222 shall revise the expenditures of departments or agencies funded from those revenue
1223 sources to prevent the making of expenditures in excess of revenues. If the executive
1224 determines that the fund has unrestricted reserves, the executive may use these reserves to
1225 avoid making expenditure reductions; however, the use of reserves may not reduce the
1226 fund balances below target reserve amounts. If the use of reserves exceeds five percent
1227 of the total appropriation, the council shall be notified in the quarterly management and
1228 budget report. An expenditure shall not be made from any portion of an appropriation
1229 that has been assigned to a reserve status except as provided in this section.

1230 B. All unexpended appropriations in noncapital appropriation ordinances lapse at
1231 the end of the fiscal period.

1232 C. The executive may transfer appropriation authority from an emergent need
1233 contingency project to support a cost increase for a capital project in the same fund in
1234 accordance with the procedures in section 21 of this ordinance.

1235 D.1. Except as provided in this subsection, an agency shall not expend or contract

1866 SECTION 76. Ordinance 13680, Section 17, and K.C.C. 28.86.170 are each
1867 hereby amended to read as follows:

1868 The capital improvement program required to implement the comprehensive
1869 water pollution abatement plan, as amended, including the RWSP, a supplement to the

comprehensive water pollution abatement plan, as amended, shall be prepared pursuant to ((K.C.C. 4.04.200 through 4.04.270)) K.C.C. 4A.xx (the chapter established in section 9 of this ordinance).

SECTION 77. Ordinance 13680, Section 18, as amended, and K.C.C. 28.86.180 are each hereby amended to read as follows:

A. The RWSP operational master plan that was adopted by council in December 1999, shall be updated on a regular basis following substantive adopted policy revisions to the RWSP, and shall meet the requirements of ((K.C.C. chapter 4.04)) K.C.C. 4A.xx (the chapter established in section 9 of this ordinance).

B. The operational master plan shall contain projects related to major program elements and shall further define as necessary the major projects, projected capacity, milestones, projected completion dates, and estimated costs.

1. Treatment capacity.

a. Population and employment growth is projected to require the wastewater system capacity to expand from two hundred forty-eight mgd to three hundred four mgd by 2030. The estimated cost and list of treatment facilities and improvements to achieve this expanded capacity by 2030, shall be included in future RWSP operational master plans, summarized in RWSP annual reports and comprehensive reviews as outlined in K.C.C. 28.86.165.

b. The Brightwater treatment plant at the Route 9 site shall be built with a capacity of thirty-six mgd by 2010 or as soon thereafter as possible to handle wastewater flows from a new north service area as defined in the plan. This plant would provide secondary treatment and would discharge treated effluent to Puget Sound. To facilitate

the production of reclaimed water, the possibility of upgrading to tertiary treatment with a freshwater outfall should be investigated (~~((prior to))~~) before subsequent expansions.

c. Expanding the treatment capacity at the south treatment plant from one hundred fifteen mgd to one hundred thirty-five mgd by 2029. This expansion would handle increased wastewater flows from the southern and eastern portions of the service area. Some or all of the plant capacity could also be upgraded to tertiary treatment, to meet water quality standards or facilitate water reuse, as part of future expansions or in additions to the secondary level of treatment using available land reserves at the plant site.

d. The west point treatment plant will be maintained at its capacity of one hundred thirty-three mgd, primarily to serve the city of Seattle and handle flows from the combined sewers in the area.

2. Conveyance facilities.

a. Conveyance facilities are to be configured, sized, and scheduled to support the treatment plants by conveying wastewater to and treated effluent from the plants. The estimated cost, schedule and list of conveyance facility improvements, shall be included in future RWSP operational master plans, summarized in RWSP annual reports and comprehensive reviews as outlined in K.C.C. 28.86.165.

b. King County will construct additional conveyance improvements (e.g., increasing conveyance and pump station capacity and extending conveyance) to accommodate increased flows in other parts of the service area to serve population growth in the smaller wastewater service basins and to prevent improper discharges from the sanitary system.

1916 3. I/I control.

1917 a. The I/I control program shall be implemented incrementally and be limited
1918 to projects that prove to be most cost effective. The estimated cost, schedule and list of
1919 I/I improvement projects, shall be included in future RWSP operational master plans,
1920 summarized in RWSP annual reports and comprehensive reviews as outlined in K.C.C.
1921 28.86.165.

1922 b. The goal of the I/I control program is to reduce the expense of conveyance
1923 system improvements over time. Every ten years, beginning in 2010, the wastewater
1924 treatment division will conduct system monitoring to update hydraulic models and
1925 measure the effectiveness of I/I control and reduction in the system.

1926 4. CSOs.

1927 a. The county shall implement CSO control projects consistent with the
1928 schedule outlined in the county's long-term CSO control plan as approved in Attachment
1929 A to Ordinance 14713 and the Environmental Protection Agency/Washington state
1930 Department of Ecology Consent Decree.

1931 b. Consistent with the Environmental Protection Agency/Washington state
1932 Department of Ecology Consent Decree, the county may request refinements to the CSO
1933 program, including changes to the sequencing of projects, in response to changing
1934 conditions, new information and new regulations.

1935 5. Biosolids.

1936 a. King County will continue to produce Class B biosolids using anaerobic
1937 digestion at the south and west treatment plants and to implement the same process at the
1938 Brightwater treatment plant until a new technology can be used reliably. The plan also

proposes that the county continue to evaluate alternative technologies to reduce the water content of biosolids while preserving their marketability. The primary objective of this evaluation will be to identify alternatives to digesters at the west treatment plant, a condition of the West Point Settlement Agreement.

b. As part of ongoing planning for its treatment plants, King County will periodically evaluate conventional, alternative and new solids processing technologies using criteria such as product quality (class A or B), marketability, odor and other potential community impacts, impact on sewer rates, reliability of the treatment process, amount of land needed for the treatment facility and the number of truck trips needed to transport the biosolids produced. Based on the results of this evaluation and public comment, the executive should recommend one of three biosolids handling scenarios at any of all of the treatment plants:

(1) continue using anaerobic digestion;

(2) supplement anaerobic digestion with another treatment technology; or

(3) replace anaerobic digestion with another treatment technology.

c. The estimated cost, schedule and list of biosolids improvement projects, shall be included in future RWSP operational master plans, summarized in RWSP annual reports and comprehensive reviews as outlined in K.C.C. 28.86.165.

d. The county should continue using a public-private partnership approach to recycling biosolids such as using biosolids on working forests in King County to enhance wildlife habitat and generate long-term income from selective timber harvests.

6. Water reuse.

1961 a. The south and west treatment plants should continue to produce reclaimed
1962 water for non-potable uses and explore the production of reclaimed water at new
1963 facilities. King County will explore the production of reclaimed water at new facilities
1964 and work with water suppliers to plan and implement an accelerated water reuse program
1965 that could augment existing water supplies.

1966 b. If a public education and involvement program on water reuse is to be
1967 developed and implemented, it shall be coordinated with water conservation education
1968 programs. The estimated cost, schedule and list of water reuse projects, shall be included
1969 in future RWSP operational master plans, summarized in RWSP annual reports and
1970 comprehensive reviews as outlined in K.C.C. 28.86.165.

1971 7. Community treatment systems.

1972 a. Any operations under these policies shall require an operational master plan
1973 as described in K.C.C. 4.04.200.C.1. Failure to submit such a plan shall cause the
1974 affected capital improvement project to be out of compliance with these policies.

1975 b. In addition to the requirements of K.C.C. 4.04.200.C.1, an operational
1976 master plan submitted under these policies shall include:

1977 (1) description of career retention programs that are to be structured in a
1978 manner consistent with the King County/metro merger, labor law and King County's
1979 labor contracts;

1980 (2) an engineering evaluation that confirms that the selected projects are most
1981 cost effective and technically efficacious and consistent with King County growth
1982 management policies for the surrounding area; and

1983 (3) explanation of how King County participation in community treatment
1984 systems is consistent with other water pollution abatement activities of the department of
1985 natural resources and parks, which currently operates centralized wastewater treatment
1986 facilities as contrasted with community treatment systems.

1987 SECTION 78. A. No later than January 31, 2015, the executive shall transmit to
1988 the council for approval by ordinance any lease or license for the possession or use of real
1989 property by the county or any decision to extend such a lease or license, as described in
1990 section 20.D.4. of this ordinance, that:

- 1991 1. Before the effective date of this ordinance was executed by the executive; and
1992 2. Under section 20.D.4 of this ordinance would have required prior council
1993 approval before the execution by the executive.

1994 B. Failure to comply with this section may result in the council withholding or
1995 disappropriating moneys for the leases or licenses.
1996
